Experience

Revolent | GCP Cloud Engineer May 2023– Current

- Led the development of React and Next.js applications, boosting user engagement and subscription rates through precise execution and analytical strategies.
- Fostered strong relationships with cross-functional teams, driving front-end strategies aligning with the brand's broader narratives.
- Orchestrated the deployment of diverse projects on cloud platforms, enhancing security, scalability, and cost-effectiveness.

JBS Capacitors | Assistant Software Engineer May 2022 – Dec 2022

- Utilised analytical skills and effective communication to complete React and React Native projects for both mobile and web, achieving a 15% increase in user engagement.
- Developed a cross-platform newsletter sign-up system, employing A/B testing and iterative design, leading to a 20% growth in subscriber base.
- Exhibited strong project management skills in agile environments, facilitating teamwork across diverse groups to meet project deadlines and specifications.

Freelance | Frontend Software Engineer Jan 2020 - Current

- Provided tailored web solutions to numerous SMEs, emphasising user-centricity and content accessibility.
- Led SEO initiatives including keyword optimization and backlink strategies, resulting in a 30% average increase in organic website traffic.
- Seamlessly integrated APIs to link back-end and front-end data pathways, ensuring smooth data flow and enhanced functionality.

Projects

Personal Website | [Website](#)

- Conceptualised and crafted a personal portfolio website, underscoring front-end development prowess with an emphasis on multi-device responsive design.

E-commerce Store | [Website](#)

- Sculpted a user-centric e-commerce platform accentuating intuitive navigation, adaptability, and heightened user interactions.

React Templates Site | [Website](#)

- Curated a collection of React templates adaptable for various web projects, meeting a spectrum of client requirements.
